

City of North Miami Clair T. Singerman Employees Retirement System

ACTUARIAL VALUATION REPORT
AS OF OCTOBER 1, 2018

ANNUAL EMPLOYER CONTRIBUTION FOR THE FISCAL YEAR
ENDING SEPTEMBER 30, 2020

March 18, 2019

Board of Trustees
Clair T. Singerman Employees Retirement System
North Miami, Florida

Dear Board Members:

The results of the October 1, 2018 Annual Actuarial Valuation of the City of North Miami Clair T. Singerman Employees Retirement System are presented in this report.

This report was prepared at the request of the Board and is intended for use by the Retirement System and those designated or approved by the Board. This report may be provided to parties other than the System only in its entirety and only with the permission of the Board. GRS is not responsible for unauthorized use of this report.

The purposes of the valuation are to measure the System's funding progress, to determine the employer contribution rate for the fiscal year ending September 30, 2020, and to determine the actuarial information for GASB Statement No. 67 for the fiscal year ending September 30, 2018. This report should not be relied on for any purpose other than the purposes described herein. Determinations of financial results, associated with the benefits described in this report, for purposes other than those identified above may be significantly different.

The contribution rate in this report is determined using the actuarial assumptions and methods disclosed in Section B of this report. This report includes risk metrics in Section A but does not include a more robust assessment of the risks of future experience not meeting the actuarial assumptions. Additional assessment of risks was outside the scope of this assignment.

This valuation assumed the continuing ability of the plan sponsor to make the contributions necessary to fund this plan. A determination regarding whether or not the plan sponsor is actually able to do so is outside our scope of expertise and was not performed.

The findings in this report are based on data or other information through September 30, 2018. The valuation was based upon information furnished by the Plan Administrator concerning Retirement System benefits, financial transactions, plan provisions and active members, terminated members, retirees and beneficiaries. We checked for internal and year-to-year consistency, but did not otherwise audit the data. We are not responsible for the accuracy or completeness of the information provided by the Plan Administrator.

This report was prepared using certain assumptions approved by the Board as authorized under Florida Statutes and prescribed by the Florida Statutes as described in the section of this report entitled Actuarial Assumptions and Methods. The investment return assumption was prescribed by the Board and the assumed mortality rates detailed in the Actuarial Assumptions and Methods section were prescribed by Chapter 112.63, Florida Statutes. All actuarial assumptions used in this report are reasonable for purposes of this valuation.

This report has been prepared by actuaries who have substantial experience valuing public employee retirement systems. To the best of our knowledge the information contained in this report is accurate and fairly presents the actuarial position of the Retirement System as of the valuation date. All calculations have been made in conformity with generally accepted actuarial principles and practices, with the Actuarial Standards of Practice issued by the Actuarial Standards Board and with applicable statutes.

Jeffrey Amrose and Trisha Amrose are members of the American Academy of Actuaries. These actuaries meet the Academy's Qualification Standards to render the actuarial opinions contained herein.

The signing actuaries are independent of the plan sponsor.

This actuarial valuation and/or cost determination was prepared and completed by us or under our direct supervision, and we acknowledge responsibility for the results. To the best of our knowledge, the results are complete and accurate. In our opinion, the techniques and assumptions used are reasonable, meet the requirements and intent of Part VII, Chapter 112, Florida Statutes, and are based on generally accepted actuarial principles and practices. There is no benefit or expense to be provided by the plan and/or paid from the plan's assets for which liabilities or current costs have not been established or otherwise taken into account in the valuation. All known events or trends which may require a material increase in plan costs or required contribution rates have been taken into account in the valuation.

Gabriel, Roeder, Smith & Company will be pleased to review this valuation and Report with the Board of Trustees and to answer any questions pertaining to the valuation.

Respectfully submitted,

GABRIEL, ROEDER, SMITH AND COMPANY

SECTION A

DISCUSSION OF VALUATION RESULTS

DISCUSSION OF VALUATION RESULTS

Comparison of Required Employer Contributions

A comparison of the required employer contribution developed in this valuation and the last valuation is as follows.

	For FYE 9/30/2020 Based on 10/1/2018 Valuation	For FYE 9/30/2019 Based on 10/1/2017 Valuation	Increase (Decrease)
Actuarially Determined Employer Contribution As % of Covered Payroll	\$ 4,126,483 34.41 %	\$ 5,731,935 47.81 %	\$ (1,605,452) (13.40) %

The contribution has been adjusted for interest on the basis that payments are made on the first day of the fiscal year by both the City and the County.

The actual Employer contribution during the year ending September 30, 2018 was \$5,330,992. The required contribution was \$5,330,992 for that year based on a payment date of October 1, 2017 for the City contributions on behalf of general employees and police officers and for the County contribution on behalf of firefighters.

Employer Contributions by Group

Separate actuarial valuations have been performed for general employees, police officers and firefighters. Results are as follows:

Group	Actuarially Determined Employer Contribution for FYE 9/30/2020	
	Dollar Amount	% of Payroll
General Employees	\$ 3,890,957	32.77 %
Police Officers	127,130	105.26
Firefighters	108,396	N/A
	<u>4,126,483</u>	<u>34.41</u>

Revisions in Benefits

There were no changes in benefits in the current valuation.

Revisions in Actuarial Assumptions and Methods

The investment return assumption was changed from 6.95% to 6.85%, net of investment expenses. The assumed rate of investment return will continue to be lowered by 0.10% each year until reaching 6.75%. The assumption change increased the Required Employer Contribution by \$227,800, or 1.9% of covered payroll.

Actuarial Experience

There was a net actuarial loss of \$1,737,066 for the year which means that actual experience was less favorable than expected. The loss was primarily due to greater than expected salary increases during the year for General Employees (7.6% actual average salary increases versus 4.2% assumed) and less mortality than expected among retirees. The loss was partially offset by gains from investment earnings above the assumed rate of 6.95% from the prior valuation. The return on the actuarial valuation of assets was 8.0%, while the return on the market value of assets was 10.6%. The experience loss caused the Required Employer Contribution to increase by approximately \$240,000, or 2.0% of covered payroll.

Funded Ratio

This year's funded ratio is 89.2% compared to 88.6% last year. The funded ratio was 90.3% before the assumption change described above. The ratio is equal to the actuarial value of assets divided by the actuarial accrued (past service) liability.

Analysis of Change in Required Employer Contribution

The components of change in the required contribution are as follows:

Contribution rate last year	47.81 %
Change in assumptions	1.90
Payment on unfunded liability*	(17.75)
Experience gain/loss	2.00
Change in administrative expense	0.37
Change in Normal Cost rate	<u>0.08</u>
Contribution rate this year	34.41 %

* Primarily due to the expiration of a \$1.85 million amortization base for General Employees.

Variability of Future Contribution Rates

One consequence of a plan closure is that, in general, the annual payment on the unfunded accrued liability will continue to increase as a percentage of covered payroll, as such payroll decreases from year to year. Additionally, when experience differs from the assumptions, as it often does, the employer's contribution rate can vary significantly from year-to-year. Over time, if the year-to-year gains and losses offset each other, the contribution rate would be expected to increase at a rate that is inversely proportional to the rate of shrinking payroll, but this does not always happen.

The Market Value of Assets exceeds the Actuarial Value of Assets by \$5,183,293 as of the valuation date (see Section C). This difference will be gradually recognized in the absence of offsetting losses. In turn, the computed employer contribution would gradually decrease by approximately \$690,000.

Relationship to Market Value

If Market Value had been the basis for the valuation, the Employer contribution would have been approximately \$3.43 million and the funded ratio would have been 93.0%.

Conclusion

The remainder of this Report includes detailed actuarial valuation results, information relating to the pension fund, financial accounting information, miscellaneous employee data and a summary of plan provisions.

RISKS ASSOCIATED WITH MEASURING THE ACCRUED LIABILITY AND ACTUARIALLY DETERMINED CONTRIBUTION

The determination of the accrued liability and the actuarially determined contribution requires the use of assumptions regarding future economic and demographic experience. Risk measures, as illustrated in this report, are intended to aid in the understanding of the effects of future experience differing from the assumptions used in the course of the actuarial valuation. Risk measures may also help with illustrating the potential volatility in the accrued liability and the actuarially determined contribution that result from the differences between actual experience and the actuarial assumptions.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions due to changing conditions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period, or additional cost or contribution requirements based on the Plan's funded status); and changes in plan provisions or applicable law. The scope of an actuarial valuation does not include an analysis of the potential range of such future measurements.

Examples of risk that may reasonably be anticipated to significantly affect the plan's future financial condition include:

1. Investment risk – actual investment returns may differ from the expected returns;
2. Contribution risk – actual contributions may differ from expected future contributions. For example, actual contributions may not be made in accordance with the plan's funding policy or material changes may occur in the anticipated number of covered employees, covered payroll, or other relevant contribution base;
3. Salary and Payroll risk – actual salaries and total payroll may differ from expected, resulting in actual future accrued liability and contributions differing from expected;
4. Longevity risk – members may live longer or shorter than expected and receive pensions for a period of time other than assumed;
5. Other demographic risks – members may terminate, retire or become disabled at times or with benefits other than assumed resulting in actual future accrued liability and contributions differing from expected.

The effects of certain trends in experience can generally be anticipated. For example if the investment return since the most recent actuarial valuation is less (or more) than the assumed rate, the cost of the plan can be expected to increase (or decrease). Likewise if longevity is improving (or worsening), increases (or decreases) in cost can be anticipated.

The computed contribution rate shown on page 1 may be considered as a minimum contribution rate that complies with the Board's funding policy. The timely receipt of the actuarially determined contributions is critical to support the financial health of the plan. Users of this report should be aware that contributions made at the actuarially determined rate do not necessarily guarantee benefit security.

PLAN MATURITY MEASURES

Risks facing a pension plan evolve over time. A young plan with virtually no investments and paying few benefits may experience little investment risk. An older plan with a large number of members in pay status and a significant trust may be much more exposed to investment risk. Generally accepted plan maturity measures include the following:

	<u>2018</u>	<u>2017</u>
Ratio of the market value of assets to payroll	10.81	9.89
Ratio of actuarial accrued liability to payroll	11.63	10.99
Ratio of actives to retirees and beneficiaries	0.8	0.9
Ratio of net cash flow to market value of assets	-1.46 %	-1.51 %

RATIO OF MARKET VALUE OF ASSETS TO PAYROLL

The relationship between assets and payroll is a useful indicator of the potential volatility of contributions. For example, if the market value of assets is 2.0 times the payroll, a return on assets 5% different than assumed would equal 10% of payroll. A higher (lower) or increasing (decreasing) level of this maturity measure generally indicates a higher (lower) or increasing (decreasing) volatility in plan sponsor contributions as a percentage of payroll.

RATIO OF ACTUARIAL ACCRUED LIABILITY TO PAYROLL

The relationship between actuarial accrued liability and payroll is a useful indicator of the potential volatility of contributions for a fully funded plan. A funding policy that targets a funded ratio of 100% is expected to result in the ratio of assets to payroll and the ratio of liability to payroll converging over time.

The ratio of liability to payroll may also be used as a measure of sensitivity of the liability itself. For example, if the actuarial accrued liability is 2.5 times the payroll, a change in liability 2% other than assumed would equal 5% of payroll. A higher (lower) or increasing (decreasing) level of this maturity measure generally indicates a higher (lower) or increasing (decreasing) volatility in liability (and also plan sponsor contributions) as a percentage of payroll.

RATIO OF ACTIVES TO RETIREES AND BENEFICIARIES

A young plan with many active members and few retirees will have a high ratio of active to retirees. A mature open plan may have close to the same number of actives to retirees resulting in a ratio near 1.0. A super-mature or closed plan may have significantly more retirees than actives resulting in a ratio below 1.0.

RATIO OF NET CASH FLOW TO MARKET VALUE OF ASSETS

A positive net cash flow means contributions exceed benefits and expenses. A negative cash flow means existing funds are being used to make payments. A certain amount of negative net cash flow is generally expected to occur when benefits are prefunded through a qualified trust. Large negative net cash flows as a percent of assets may indicate a super-mature plan or a need for additional contributions.

ADDITIONAL RISK ASSESSMENT

Additional risk assessment is outside the scope of the annual actuarial valuation. Additional assessment may include scenario tests, sensitivity tests, stochastic modeling, stress tests, and a comparison of the present value of accrued benefits at low-risk discount rates with the actuarial accrued liability.

CHAPTER REVENUE

Increments in Chapter revenue over that received in 1998 must first be used to fund the cost of compliance with minimum benefits.

As of the valuation date, the following minimum benefits of Chapter 185 have not been adopted: allow normal retirement at age 55 with ten years of service; change the normal form of benefit from a single life annuity to a ten year certain and life annuity; allow early retirement at age 50 with ten years of service; reduce the early retirement penalty to 3%; provide that the service connected disability benefit will be no less than the accrued pension; remove the 50% limit on the non-service disability benefit; provide a preretirement death benefit for all vested members equal to the accrued pension payable at what would have been the normal or early retirement date; and provide 100% vesting at ten years of service.

Actuarial Confirmation of the Use of State Chapter Money			
	748 Plan	691 Plan	Total
1. Base Amount Previous Plan Year (Excluding Amount Allocated to Share Plan)	82,682	-	82,682
2. Amount Received for Previous Plan Year	364,998	3,173	368,171
3. Amount Allocated to Share Plan	146,314	1,272	147,586
4. Amount Received for Previous Plan Year After Share Plan Allocation (2) - (3)	218,684	1,901	220,585
5. Benefit Improvements Made in Prior Plan Year	-	-	-
6. Excess Funds for Previous Plan Year (4) - (5) - (1)	136,002	1,901	137,903
7. Accumulated Excess at Beginning of Previous Plan Year	593,965	33,529	627,494
8. Prior Excess Used in Previous Plan Year	-	-	-
9. Accumulated Excess as of Valuation Date (7) - (8) + (6)	729,967	35,430	765,397
10. Base Amount This Plan Year (Excluding Amount Allocated to the Share Plan) (1) + (5)	82,682	-	82,682

Please note that the above table presents the accounting of Chapter 185 revenue as of September 30, 2018. After September 30, 2018, the City was provided with the full balance of unallocated excess Chapter 185 revenue of \$627,494. Additionally, the \$368,171 of annual Chapter 185 revenue was reallocated by providing 50% to the City to use as an offset to the required contribution to the Police Pension Plan (748 Plan) and 50% to the Share Plan.

			23,553,447		14,356,886	2,335,517	2,186,328

* Descriptions of the source of changes for bases other than (Gain)/Loss are described below.

10/1/2005 Method Changes:

1. The funding method was changed from Aggregate to Entry Age Normal with a 20-year amortization period for general employees and a 5-year amortization period for police officers.
2. The asset valuation method was changed to the method shown in the report prepared by Stanley, Holcombe & Associates, Inc.
3. The mortality table was changed from the 1983 Group Annuity Mortality Table to the RP 2000 Generational Mortality Table.
4. The investment earnings assumption was changed from 9% per year up to retirement and 7% thereafter to 8.5% per year. The investment earnings assumption will be reduced from 8.5% to 8% in the next actuarial valuation as of October 1, 2006.
5. The retirement rates used were multiplied by 80%.
6. The salary increase assumption was changed from a flat 6% per year to a graded rate table based on service.
7. It was assumed that members will choose the option (lump sum without COLA or annuity with COLA) with the greater actuarial value.

10/1/2006 Assumption Change: The investment earnings assumption was changed from 8.5% per year to 8.0% per year.

10/1/2007 Assumption Change: The investment earnings assumption was changed from 8% per year to 7.5% per year.

10/1/2010 Assumption Change: The timing of expected pay increases was changed from end of year to mid-year timing.

10/1/2013 Amendment: The Plan was amended to provide an Employee Retirement Incentive Program (ERIP) which was offered to members who meet the Rule of 60, have at least ten years of City service, and are eligible for either normal or early retirement as of January 1, 2014. The ERIP provided a 4% benefit multiplier for the last 20 years of credited service. The lump sum form of payment was not available to ERIP retirees.

10/1/2015 Amendment: Ordinance No. 1397, adopted on March 8, 2016.

10/1/2016 Assumption Changes: Decreased the investment rate of return assumption to 7.05%. Salary increase rates, retirement rates, withdrawal rates, and disability rates have all been revised based on the experience study as of 10/1/2015. The mortality assumption was changed to the same rates used by FRS for Regular Class and Special Risk Class members in their July 1, 2016 actuarial valuation, as mandated by the Florida Statutes.

10/1/2017 Assumption Changes: Decreased the investment rate of return assumption to 6.95%. The amortization period for the unfunded actuarial accrued liability of the General Employees was lowered to 15 years for any new bases and any existing bases that had over 15 years remaining as of October 1, 2017. The amortization period for the unfunded actuarial accrued liability of the Police Officers was lowered to 5 years for any new bases and any existing bases that had over 5 years remaining as of October 1, 2017.

10/1/2018 Assumption Change: The investment earnings assumption was changed from 6.95% per year to 6.85% per year.

The Unfunded Actuarial Liability is being amortized as a level dollar amount over the number of years remaining in the amortization period.

2028	-

ACTUARIAL GAINS AND LOSSES

When the actual plan experience differs from the actuarial assumptions, an actuarial gain or loss is the result. The net actuarial gain or loss for each group is computed as follows:

	General	Police	Fire	Total
1. Last Year's UAAL	\$ 14,379,054	\$ 252,716	\$ 430,230	\$ 15,062,000
2. Last Year's Employer Normal Cost	1,151,433	31,647	-	1,183,080
3. Last Year's Contributions	5,080,575	55,140	195,277	5,330,992
4. Interest at the Assumed Rate on:				
a. 1 and 2 for one year	1,079,369	19,763	29,901	1,129,033
b. 3 from dates paid	<u>353,100</u>	<u>3,832</u>	<u>13,572</u>	<u>370,504</u>
c. Total: a - b	726,269	15,931	16,329	758,529
5. This Year's Expected UAAL (Before Changes): 1 + 2 - 3 + 4c	11,176,181	245,154	251,282	11,672,617
6. Change in UAAL Due to Change in Benefits or Assumptions	1,521,614	47,491	14,961	1,584,066
7. This Year's Expected UAAL (After Changes): 5 + 6	12,697,795	292,645	266,243	13,256,683
8. Actual UAAL (After Changes)	14,356,886	323,289	313,574	14,993,749
9. Net Actuarial Gain (Loss): 7 - 8	(1,659,091)	(30,644)	(47,331)	(1,737,066)
10. Gain (Loss) due to Investments				1,295,823
11. Gain (Loss) due to Other Causes				(3,032,889)

The fund earnings and salary increase assumptions have considerable impact on the cost of the plan so it is important that they are in line with the actual experience. The following table shows the actual fund earnings and salary increase rates compared to the assumed rates for the last few years. The actual investment return rates shown below are based on the actuarial value of assets. The actual salary increase rates shown above are the increases received by those active members who were included in the actuarial valuations both at the beginning and end of each year.

Period	Annualized Investment Return		Annualized Salary Increases	
	Actual	Assumed	Actual	Assumed
01/1/77 - 01/1/78	3.2 %	6.0 %	7.0 %	4.5 %
10/1/78 - 9/30/79	3.5	6.0	15.0	4.5

ACTUARIAL ASSUMPTIONS AND COST METHOD

Valuation Methods

Actuarial Cost Method - Normal cost and the allocation of benefit values between service rendered before and after the valuation date were determined using an **Individual Entry-Age Actuarial Cost Method** having the following characteristics:

- (i) the annual normal cost for each individual active member, payable from the date of employment to the date of retirement, is sufficient to accumulate the value of the member's benefit at the time of retirement;
- (ii) each annual normal cost is a constant percentage of the member's year by year projected covered pay.

Actuarial gains/(losses), as they occur, reduce (increase) the Unfunded Actuarial Accrued Liability.

Financing of Unfunded Actuarial Accrued Liabilities - Unfunded Actuarial Accrued Liabilities (full funding credit if assets exceed liabilities) were amortized by level (principal & interest combined) dollar contributions over a reasonable period of future years.

Actuarial Value of Assets - The Actuarial Value of Assets phase in the difference between the expected actuarial value and actual market value of assets at the rate of 20% per year. The Actuarial Value of Assets will be further adjusted to the extent necessary to fall within the corridor whose lower limit is 80% of the Market Value of plan assets and whose upper limit is 120% of the Market Value of plan assets. During periods when investment performance exceeds the assumed rate, Actuarial Value of Assets will tend to be less than Market Value. During periods when investment performance is less than assumed rate, Actuarial Value of Assets will tend to be greater than Market Value.

Valuation Assumptions

The actuarial assumptions used in the valuation are shown in this Section. Both the economic and decrement assumptions were established following the Experience Study Report as of October 1, 2015. The covered group is too small to provide statistically significant experience on which to base the mortality assumption. Mortality is based on a commonly used mortality table and projection scale.

Economic Assumptions

The investment return rate assumed in the valuations is 6.85% per year, compounded annually (net after investment expenses).

The Inflation Rate assumed in this valuation is 2.5% per year. The Inflation Rate is defined to be the long term rate of annual increases in goods and services.

The assumed **real rate of return** over inflation is defined to be the portion of total investment return that is more than the assumed inflation rate. Considering other economic assumptions, the 6.85% investment return rate translates to an assumed real rate of return over wage inflation of 4.35%.

Pay increase assumptions for individual active members are shown below. Part of the assumption for each service year is for productivity, merit and/or seniority increases, and the other 2.5% recognizes inflation.

The rates of salary increase used for individual members are in accordance with the following table. This assumption is used to project a member's current salary to the salaries upon which benefits will be based.

Years of Service	% Increase in Salary		
	Merit and Seniority	Base (Economic)	Total Increase
0 - 2	3.5%	2.5%	6.0%
3 - 5	2.5%	2.5%	5.0%
6 - 9	2.0%	2.5%	4.5%
10 - 14	1.5%	2.5%	4.0%
15 - 19	1.0%	2.5%	3.5%
20 and Higher	0.5%	2.5%	3.0%

Demographic Assumptions

The mortality table for General Employees is the RP-2000 Combined Healthy Participant Mortality Table (for pre-retirement mortality) and the RP-2000 Mortality Table for Annuitants (for post-retirement mortality) with future improvements in mortality projected to all future years using Scale BB. For females, the base mortality rates include a 100% white collar adjustment. For males, the base mortality rates include a 50% blue collar adjustment and a 50% white collar adjustment. These are the same rates used for Regular Class members of the Florida Retirement System (FRS) in their actuarial valuation as of July 1, 2016.

FRS Healthy Post-Retirement Mortality for Regular Class Members

65	1.13	0.73	20.95	23.74
70	1.75	1.22	16.69	19.27
75	2.92	2.07	12.82	15.19
80	4.95	3.47	9.47	11.56

This assumption is used to measure the probabilities of each benefit payment being made after retirement.

FRS Healthy Pre-Retirement Mortality for Regular Class Members

Sample Attained Ages (in 2018)	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	0.21 %	0.15 %	35.69	38.75
55	0.36	0.24	30.57	33.61
60	0.61	0.39	25.64	28.59
65	1.07	0.70	20.99	23.76
70	1.75	1.22	16.69	19.27
75	2.92	2.07	12.82	15.19
80	4.95	3.47	9.47	11.56

This assumption is used to measure the probabilities of active members dying prior to retirement. All deaths before retirement are assumed to be non-service connected.

For disabled retirees, the mortality table used was the RP-2000 mortality for disabled annuitants, set-back 4 years for males and set-forward 2 years for females, with no provision being made for future mortality improvements. These are the same rates used for Regular Class members of the Florida Retirement System (FRS) in their actuarial valuation as of July 1, 2016.

FRS Disabled Mortality for Regular Class Members

Sample Attained Ages (in 2018)	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	2.38 %	1.35 %	20.25	23.74
55	3.03	1.87	17.78	20.46
60	3.67	2.41	15.55	17.43
65	4.35	3.13	13.44	14.58
70	5.22	4.29	11.39	11.96
75	6.58	5.95	9.43	9.65
80	8.70	8.23	7.65	7.66

The mortality table for Police and Fire members is the RP-2000 Combined Healthy Participant Mortality Table (for pre-retirement mortality) and the RP-2000 Mortality Table for Annuitants (for post-retirement mortality) with future improvements in mortality projected to all future years using Scale BB. For females, the base mortality rates include a 100% white collar adjustment. For males, the base mortality rates include a 90% blue collar adjustment and a 10% white collar adjustment. These are the same rates used for Special Risk Class members of the Florida Retirement System (FRS) in their actuarial valuation as of July 1, 2016.

FRS Healthy Post-Retirement Mortality for Special Risk Class Members

Sample Attained Ages (in 2018)	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	0.53 %	0.23 %	34.01	38.40
55	0.67	0.32	29.37	33.39
60	0.90	0.47	24.80	28.48
65	1.29	0.73	20.40	23.74
70	1.98	1.22	16.26	19.27
75	3.21	2.07	12.52	15.19
80	5.29	3.47	9.30	11.56

This assumption is used to measure the probabilities of each benefit payment being made after retirement.

FRS Healthy Pre-Retirement Mortality for Special Risk Class Members

Sample Attained Ages (in 2018)	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	0.22 %	0.15 %	35.00	38.75
55	0.39	0.24	29.88	33.61
60	0.71	0.39	25.00	28.59
65	1.21	0.70	20.44	23.76
70	1.98	1.22	16.26	19.27
75	3.21	2.07	12.52	15.19
80	5.29	3.47	9.30	11.56

This assumption is used to measure the probabilities of active members dying prior to retirement. All deaths before retirement are assumed to be non-service connected.

For disabled retirees, the mortality table used was 60% of the RP-2000 Mortality Table for Disabled Annuitants with ages set back 4 years for males and set forward 2 years for females, and 40% of the RP-2000 Annuitants Mortality Table with a White Collar adjustment with no age set back, both with no provision being made for future mortality improvements. These are the same rates used for Special Risk Class members of the Florida Retirement System (FRS) in their actuarial valuation as of July 1, 2016.

FRS Disabled Mortality for Special Risk Class Members

Sample Attained Ages (in 2018)	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	1.67 %	0.91 %	23.74	27.06
55	2.03	1.26	20.77	23.37
60	2.47	1.67	17.91	19.90
65	3.07	2.24	15.15	16.62
70	3.90	3.18	12.52	13.58
75	5.30	4.60	10.02	10.86
80	7.59	6.66	7.80	8.48

The rates of retirement used to measure the probability of eligible members retiring during the next year were as follows:

Number of Years After First Eligibility for Normal Retirement	Probability of Normal Retirement
0	30 %
1	25
2	25
3	25
4	25
5	50
6	50
7	50
8	50
9	50
10+	100

The rate of retirement is 7% for each year of eligibility for early retirement under the early retirement eligibility at 14 years of service regardless of age. The rate of retirement is 10% for each year of eligibility for early retirement under the early retirement eligibility at age 55 with 10 years of service.

Rates of separation from active membership were as shown below (rates do not apply to members eligible to retire and do not include separation on account of death or disability). This assumption measures the probabilities of members remaining in employment.

Sample Ages	Years of Service	% of Active Members Separating Within Next Year
ALL	Under 1	13.0 %
	1	13.0
	2	13.0
	3	10.0
	4	10.0
	5	9.0
	6	9.0
	7	5.0
	8	4.5
	9	4.0
25 - 39	10 & Over	4.0
40 - 49		3.5
50 & Over		3.0

Rates of disability among active members. (50% of future disability retirements are assumed to be service-connected.)

Sample Ages	% of Active Members Becoming Disabled Within Next Year
20	0.01%
25	0.01%
30	0.01%
35	0.01%
40	0.02%
45	0.03%
50	0.05%
55	0.10%
60	0.17%

Changes Since Prior Valuation – The investment return assumption was lowered from 6.95% to 6.85%. This rate will continue to be lowered by 0.1% each year until 6.75% is reached.

Miscellaneous and Technical Assumptions

<i>Administrative & Investment Expenses</i>	The investment return assumption is intended to be the return net of investment expenses. Annual administrative expenses are assumed to be equal to the average of the expenses over the previous two years. Assumed administrative expenses are added to the Normal Cost.
<i>Benefit Service</i>	Exact fractional service is used to determine the amount of benefit payable.
<i>COLA</i>	For future retirees, benefits are assumed to increase at rates varying from 1.5% to 3% per year, starting five years after retirement, based on service as of November 10, 2015.
<i>Decrement Operation</i>	Disability and mortality decrements operate during retirement eligibility.
<i>Decrement Timing</i>	Decrement of all types are assumed to occur at the beginning of the year.
<i>Eligibility Testing</i>	Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
<i>Forfeitures</i>	For vested separations from service, it is assumed that 0% of members separating will withdraw their contributions and forfeit an employer financed benefit. It was further assumed that the liability at termination is the greater of the vested deferred benefit (if any) or the member's accumulated contributions.
<i>Incidence of Contributions</i>	Employer contributions are assumed to be made at the beginning of the fiscal year for general employees and police officers and at the end of each calendar quarter for firefighters. Member contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made.
<i>Marriage Assumption</i>	100% of males and 100% of females are assumed to be married for purposes of death-in-service benefits. Male spouses are assumed to be three years older than female spouses for active member valuation purposes.
<i>Normal Form of Benefit</i>	A life annuity is the normal form of benefit.
<i>Pay Increase Timing</i>	Middle of fiscal year. This is equivalent to assuming that reported pays represent amounts paid to members during the year ended on the valuation date.
<i>Service Credit Accruals</i>	It is assumed that members accrue one year of service credit per year.

GLOSSARY

<i>Actuarial Accrued Liability (AAL)</i>	The difference between the Actuarial Present Value of Future Benefits, and the Actuarial Present Value of Future Normal Costs.
<i>Actuarial Assumptions</i>	Assumptions about future plan experience that affect costs or liabilities, such as: mortality, withdrawal, disablement, and retirement; future increases in salary; future rates of investment earnings; future investment and administrative expenses; characteristics of members not specified in the data, such as marital status; characteristics of future members; future elections made by members; and other items.
<i>Actuarial Cost Method</i>	A procedure for allocating the Actuarial Present Value of Future Benefits between the Actuarial Present Value of Future Normal Costs and the Actuarial Accrued Liability.
<i>Actuarial Equivalent</i>	Of equal Actuarial Present Value, determined as of a given date and based on a given set of Actuarial Assumptions.
<i>Actuarial Present Value (APV)</i>	The amount of funds required to provide a payment or series of payments in the future. It is determined by discounting the future payments with an assumed interest rate and with the assumed probability each payment will be made.
<i>Actuarial Present Value of Future Benefits (APVFB)</i>	The Actuarial Present Value of amounts which are expected to be paid at various future times to active members, retired members, beneficiaries receiving benefits, and inactive, nonretired members entitled to either a refund or a future retirement benefit. Expressed another way, it is the value that would have to be invested on the valuation date so that the amount invested plus investment earnings would provide sufficient assets to pay all projected benefits and expenses when due.
<i>Actuarial Valuation</i>	The determination, as of a valuation date, of the Normal Cost, Actuarial Accrued Liability, Actuarial Value of Assets, and related Actuarial Present Values for a plan. An Actuarial Valuation for a governmental retirement system typically also includes calculations of items needed for compliance with GASB No. 67.
<i>Actuarial Value of Assets</i>	The value of the assets as of a given date, used by the actuary for valuation purposes. This may be the market or fair value of plan assets or a smoothed value in order to reduce the year-to-year volatility of calculated results, such as the funded ratio and the actuarially determined employer contribution (ADEC).

<i>Amortization Method</i>	A method for determining the Amortization Payment. The most common methods used are level dollar and level percentage of payroll. Under the Level Dollar method, the Amortization Payment is one of a stream of payments, all equal, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the Amortization Payment is one of a stream of increasing payments, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the stream of payments increases at the rate at which total covered payroll of all active members is assumed to increase.
<i>Amortization Payment</i>	That portion of the plan contribution or ADEC which is designed to pay interest on and to amortize the Unfunded Actuarial Accrued Liability.
<i>Amortization Period</i>	The period used in calculating the Amortization Payment.
<i>Actuarially Determined Employer Contribution (ADEC)</i>	The employer's periodic required contributions, expressed as a dollar amount or a percentage of covered plan compensation. The ADEC consists of the Employer Normal Cost and Amortization Payment.
<i>Closed Amortization Period</i>	A specific number of years that is reduced by one each year, and declines to zero with the passage of time. For example if the amortization period is initially set at 30 years, it is 29 years at the end of one year, 28 years at the end of two years, etc.
<i>Employer Normal Cost</i>	The portion of the Normal Cost to be paid by the employer. This is equal to the Normal Cost less expected member contributions.
<i>Equivalent Single Amortization Period</i>	For plans that do not establish separate amortization bases (separate components of the UAAL), this is the same as the Amortization Period. For plans that do establish separate amortization bases, this is the period over which the UAAL would be amortized if all amortization bases were combined upon the current UAAL payment.
<i>Experience Gain/Loss</i>	A measure of the difference between actual experience and that expected based upon a set of Actuarial Assumptions, during the period between two actuarial valuations. To the extent that actual experience differs from that assumed, Unfunded Actuarial Accrued Liabilities emerge which may be larger or smaller than projected. Gains are due to favorable experience, e.g., the assets earn more than projected, salaries do not increase as fast as assumed, members retire later than assumed, etc. Favorable experience means actual results produce actuarial liabilities not as large as projected by the actuarial assumptions. On the other hand, losses are the result of unfavorable experience, i.e., actual results that produce Unfunded Actuarial Accrued Liabilities which are larger than projected.
<i>Funded Ratio</i>	The ratio of the Actuarial Value of Assets to the Actuarial Accrued Liability.

<i>GASB</i>	Governmental Accounting Standards Board.
<i>GASB No. 67 and GASB No. 68</i>	These are the governmental accounting standards that set the accounting rules for public retirement systems and the employers that sponsor or contribute to them. Statement No. 68 sets the accounting rules for the employers that sponsor or contribute to public retirement systems, while Statement No. 67 sets the rules for the systems themselves.
<i>Normal Cost</i>	The annual cost assigned, under the Actuarial Cost Method, to the current plan year.
<i>Open Amortization Period</i>	An open amortization period is one which is used to determine the Amortization Payment but which does not change over time. In other words, if the initial period is set as 30 years, the same 30-year period is used in determining the Amortization Period each year. In theory, if an Open Amortization Period is used to amortize the Unfunded Actuarial Accrued Liability, the UAAL will never completely disappear, but will become smaller each year, either as a dollar amount or in relation to covered payroll.
<i>Unfunded Actuarial Accrued Liability</i>	The difference between the Actuarial Accrued Liability and Actuarial Value of Assets.
<i>Valuation Date</i>	The date as of which the Actuarial Present Value of Future Benefits are determined. The benefits expected to be paid in the future are discounted to this date.

NOTES TO SCHEDULE OF EMPLOYER'S NET PENSION LIABILITY
GASB Statement No. 67

Valuation Date: October 1, 2017
Measurement Date: September 30, 2018

Methods and Assumptions Used to Determine Net Pension Liability:

Actuarial Cost Method	Entry Age Normal
Inflation	2.50%
Salary Increases	3.00% to 6.00% depending on service
Investment Rate of Return	6.95%
Retirement Age	Experience-based table of rates
Mortality	<p>The mortality table for General Employees is the RP-2000 Combined Healthy Participant Mortality Table (for pre-retirement mortality) and the RP-2000 Mortality Table for Annuitants (for post-retirement mortality) with future improvements in mortality projected to all future years using Scale BB. For females, the base mortality rates include a 100% white collar adjustment. For males, the base mortality rates include a 50% blue collar adjustment and a 50% white collar adjustment. These are the same rates used for Regular Class members of the Florida Retirement System (FRS) in their actuarial valuation as of July 1, 2016, as mandated by Chapter 112.63, Florida Statutes.</p> <p>The mortality table for Police and Fire members is the RP-2000 Combined Healthy Participant Mortality Table (for pre-retirement mortality) and the RP-2000 Mortality Table for Annuitants (for post-retirement mortality) with future improvements in mortality projected to all future years using Scale BB. For females, the base mortality rates include a 100% white collar adjustment. For males, the base mortality rates include a 90% blue collar adjustment and a 10% white collar adjustment. These are the same rates used for Special Risk Class members of the Florida Retirement System (FRS) in their actuarial valuation as of July 1, 2016, as mandated by Chapter 112.63, Florida Statutes.</p>

Notes See Discussion of Valuation Results in the October 1, 2017 Actuarial Valuation Report.

SCHEDULE OF CONTRIBUTIONS
GASB Statement No. 67

<u>FY Ending September 30,</u>	<u>Actuarially Determined Contribution</u>	<u>Actual Contribution</u>	<u>Contribution Deficiency (Excess)</u>	<u>Covered Payroll</u>	<u>Actual Contribution as a % of Covered Payroll</u>
2014	\$ 4,196,181	\$ 4,196,181	\$ -	\$ 11,279,986	37.20%
2015	5,598,011	5,598,011	-	12,192,229	45.91%
2016	5,993,388	5,993,388	-	11,618,974	51.58%
2017	5,028,652	5,028,652	-	11,834,735	42.49%
2018	5,330,992	5,330,992	-	11,989,341	44.46%

NOTES TO SCHEDULE OF CONTRIBUTIONS

GASB Statement No. 67

Valuation Date: October 1, 2016

Notes Actuarially determined contributions are calculated as of October 1, which is two years prior to the end of the fiscal year in which contributions are reported.

Methods and Assumptions Used to Determine Contribution Rates:

Actuarial Cost Method	Entry Age Normal
Amortization Method	General: Level Dollar, Closed Police and Fire: Level Dollar, Closed
Remaining Amortization Period	20 years
Asset Valuation Method	Recognition of 20% of difference between market value of assets and expected actuarial value of assets
Inflation	2.50%
Salary Increases	3.00% to 6.00% depending on service
Investment Rate of Return	7.05%
Retirement Age	Experience-based table of rates
Mortality	The mortality table for General Employees is the RP-2000 Combined Healthy Participant Mortality Table (for pre-retirement mortality) and the RP-2000 Mortality Table for Annuitants (for post-retirement mortality) with future improvements in mortality projected to all future years using Scale BB. For females, the base mortality rates include a 100% white collar adjustment. For males, the base mortality rates include a 50% blue collar adjustment and a 50% white collar adjustment. These are the same rates used for Regular Class members of the Florida Retirement System (FRS) in their actuarial valuation as of July 1, 2016, as mandated by Chapter 112.63, Florida Statutes.

The mortality table for Police and Fire members is the RP-2000 Combined Healthy Participant Mortality Table (for pre-retirement mortality) and the RP-2000 Mortality Table for Annuitants (for post-retirement mortality) with future improvements in mortality projected to all future years using Scale BB. For females, the base mortality rates include a 100% white collar adjustment. For males, the base mortality rates include a 90% blue collar adjustment and a 10% white collar adjustment. These are the same rates used for Special Risk Class members of the Florida Retirement System (FRS) in their actuarial valuation as of July 1, 2016, as mandated by Chapter 112.63, Florida Statutes.

Other Information:

Notes See Discussion of Valuation Results in the October 1, 2016 Actuarial Valuation Report

SINGLE DISCOUNT RATE GASB Statement No. 67

A single discount rate of 6.95% was used to measure the total pension liability. This single discount rate was based on the expected rate of return on pension plan investments of 6.95%. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between the total actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments (6.95%) was applied to all periods of projected benefit payments to determine the total pension liability.

Regarding the sensitivity of the net pension liability to changes in the single discount rate, the following presents the plan's net pension liability, calculated using a single discount rate of 6.95%, as well as what the plan's net pension liability would be if it were calculated using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher:

Sensitivity of the Net Pension Liability to the Single Discount Rate Assumption

1% Decrease	Current Single Discount Rate Assumption	1% Increase
5.95%	6.95%	7.95%
\$22,302,647	\$5,358,340	(\$8,673,558)

SECTION F

SUMMARY OF PLAN PROVISIONS

SUMMARY OF PLAN PROVISIONS

A. Ordinances

The Plan was established under the Code of Ordinances for the City of North Miami, Florida, Chapter 15, Article III, and was most recently amended under Ordinance No. 1397 passed and adopted on March 8, 2016. The Plan is also governed by certain provisions of Chapters 175 and 185, Florida Statutes, Part VII, Chapter 112, Florida Statutes (F.S.) and the Internal Revenue Code.

B. Effective Date

January 1, 1968

C. Plan Year

October 1 through September 30

D. Type of Plan

Qualified, governmental defined benefit retirement plan; for GASB purposes it is a single employer plan.

E. Eligibility Requirements

All full-time general employees hired prior to June 1, 2016 are eligible. General employees hired on or after June 1, 2016 will participate in the Florida Retirement System.

F. Credited Service

Service is measured as the total number of calendar years, or portions thereof, during which the member has served as an employee of the City and has made the required contributions to the Plan. No service is credited for any periods of employment for which the member received a refund of employee contributions.

G. Compensation

Total compensation including member contributions which are "picked up" by the City, but excluding overtime, bonuses and other certain payments.

H. Average Final Compensation (AFC)

For members who reached their normal retirement date on or before September 29, 2016:

AFC is the average of Compensation over the highest 2 years out of the last 10 years of Credited Service prior to termination or retirement. AFC excludes lump sum payment of unused leave.

For all other members:

Effective September 30, 2016, AFC is the average of Compensation over the highest 3 years out of the last 10 years of Credited Service prior to termination or retirement. AFC excludes lump sum payment of unused leave. Effective September 30, 2017, the "highest 3 years" will be replaced by the "highest 4 years" and beginning September 30, 2018, "the highest 4 years" will be replaced by "the highest 5 years".

I. Normal Retirement

Eligibility: General employees may retire on the first day of the month coincident with or next following the earlier of:

- (1) age 62 and 10 years of Credited Service, or
- (2) age 55 and 20 years of Credited Service.

Police officers and firefighters may retire on the first day of the month coincident with or next following age 50 and 20 years of Credited Service.

Benefit: 2.5% of AFC multiplied by Credited Service up to July 1, 1969, plus 3.0% of AFC multiplied by Credited Service after July 1, 1969 through November 9, 2015.

Accrual rates for Credited Service earned on or after November 10, 2015:

3.0% for members who have reached their Normal Retirement date on or before November 10, 2015 and for members with 15 or more years of Credited Service as of that date.

2.5% for members with 10 or more years, but less than 15 years, of Credited Service who are not yet eligible for Normal Retirement as of November 10, 2015.

2.0% for members with less than 10 years of Credited Service on November 10, 2015.

Normal Form of Benefit: Single Life Annuity; other options are also available.

COLA: See Item V. Cost of Living Increases

J. Early Retirement

Eligibility: General employees may elect to retire earlier than the Normal Retirement Eligibility upon attainment of:

- (1) age 55 with 10 years of Credited Service, or
- (2) 14 years of Credited Service regardless of age.

Police officers and firefighters may elect to retire earlier than the Normal Retirement eligibility upon attainment of 14 years of Credited Service.

Benefit: The Normal Retirement Benefit is reduced by 4.0% for each year that the Early Retirement date precedes the Normal Retirement date.

Normal Form of Benefit: Single Life Annuity; other options are also available.

COLA: See Item V. Cost of Living Increases

K. Delayed Retirement

Same as Normal Retirement taking into account compensation earned and service credited until the date of actual retirement.

L. Service Connected Disability

Eligibility: Any member who incurs a mental or physical condition resulting from injury, disease, or mental disorder, which renders the member incapable of performing work for the City at a rate of 90% of the member's regular rate of Compensation is immediately eligible for a disability benefit.

Benefit: 75% of member's Compensation on the date of disability. The benefit will be reduced by amounts paid from other sources to the extent that, when combined with this benefit, they exceed 100% of the rate of pay in effect at the time of the disability.

Normal Form of Benefit: Payable for life, or until recovery from disability.

COLA: None

M. Non-Service Connected Disability

Eligibility: Any member who incurs a mental or physical condition resulting from injury, disease, or mental disorder, which renders the member incapable of performing work for the City at a rate of 75% of the member's regular rate of Compensation is immediately eligible for a disability benefit.

Benefit: The member's vested accrued benefit payable at the Normal Retirement date taking into account compensation earned and service credited on the date of disability with a maximum equal to 50% of Compensation. The benefit will be reduced by amounts paid from other sources to the extent that, when combined with this benefit, they exceed 100% of the rate of pay in effect at the time of the disability.

Normal Form of Benefit: Payable for life, or until recovery from disability.

COLA: None

N. Death in the Line of Duty

Eligibility: Any member who dies while performing, directly or indirectly, services for the City is eligible for survivor benefits regardless of Credited Service.

Benefit: 50% of the member's monthly Compensation at the time of death shall be paid to the member's spouse. In addition, 10% of the member's final Compensation shall be paid for each child under age 19. In no event shall the total benefit exceed 100% of the member's final Compensation; or 50% if there is no surviving spouse.

Normal Form

of Benefit: Spouse benefits payable until the earlier of death or remarriage. Children's benefits are payable until age 19.

COLA: None

O. Other Pre-Retirement Death

Eligibility: Any vested member who dies while employed by the City is eligible for survivor benefits.

Benefit: For members who were eligible for Early or Normal Retirement, the member's Retirement Benefit shall be payable to the member's beneficiary.

For members who were not eligible for Early or Normal Retirement, an amount equal to the member's vested accrued benefit and accumulated contributions with interest shall be payable to the member's beneficiary.

Normal Form

of Benefit: For members who were eligible for Early or Normal Retirement, the Retirement Benefit shall be paid as though the member had elected a 10 Year Certain and Life annuity and retired immediately preceding death.

For members who were not eligible for Early or Normal Retirement, the benefit shall be paid in a lump sum.

COLA: None

The designated beneficiary of a plan member who was not vested will receive a refund of the member's accumulated contributions with interest.

P. Post Retirement Death

Benefit determined by the form of benefit elected upon retirement.

Q. Optional Forms

In lieu of electing the Normal Form of benefit, the optional forms of benefits available to all retirees are the Straight Life Annuity option, the 50%, 75%, and 100% Joint and Survivor options, or the 5 and 10 Years Certain and Life options. A Social Security option is also available for members retiring prior to the time they are eligible for Social Security retirement benefits if they are not retiring under Disability Retirement.

Alternatively, members can elect a partial lump sum with the remaining value of the benefit paid as a monthly annuity. A total lump sum distribution is also available for those who became members of the Plan prior to October 1, 2004.

R. Vested Termination

Eligibility: A member has earned a non-forfeitable right to Plan benefits after the completion of 5 years of Credited Service (see vesting table below).

Credited Service	Vested Percent
Less than 5	0%
5	25
6	40
7	55
8	70
9	85
10 or more	100

Benefit: Any member who is not eligible for any other benefits provided under the Plan will receive the vested portion of their accrued Normal Retirement Benefit as of the date of termination. Benefit begins at the member's Early or Normal Retirement date and will be reduced for Early Retirement if applicable.

Normal Form of Benefit: Single Life Annuity; other options are also available.

COLA: See Item V. Cost of Living Increases

Members terminating employment with less than 5 years of Credited Service will receive a refund of their own accumulated contributions with interest.

S. Refunds

Eligibility: All members terminating employment with less than 5 years of Credited Service are eligible. Optionally, vested members (those with 5 or more years of Credited Service) may elect a refund in lieu of the vested benefits otherwise due.

Benefit: A refund of the member's contributions with interest.

T. Member Contributions

7.0% of Compensation for members who have reached their Normal Retirement date prior to November 10, 2015 and for members who are not yet eligible for Normal Retirement as of November 10, 2015 with more than 10, but less than 15, years of Credited Service.

8.0% of Compensation for members with 15 or more years of Credited Service

6.0% of Compensation for members with less than 10 years of Credited Service and who had not reached their Normal Retirement date on or before November 10, 2015.

U. Employer Contributions

Any additional amount determined by the actuary needed to fund the plan properly according to State laws.

V. Cost of Living Increases

Members who retire after October 1, 2004 (not due to disability) and who have reached their Normal Retirement date on or before November 10, 2015, electing an annuity form of payment, receive an annual cost of living adjustment each April 1st. These retirees may choose a 1.92% COLA with a one-year delay, a 2.50% COLA with a three-year delay, or a 3.00% COLA with a five-year delay.

Members with 15 or more years of Credited Service who had not reached their Normal Retirement date on or before November 10, 2015, electing an annuity form of payment, will receive a 2.50% annual cost of living adjustment each April 1st following the 5th year of retirement.

Members with 10 or more years, but less than 15 years, of Credited Service who had not reached their Normal Retirement date on or before November 10, 2015, electing an annuity form of payment, will receive a 2.00% annual cost of living adjustment each April 1st following the 5th year of retirement.

Members with less than 10 years of Credited Service as of November 10, 2015 who elect an annuity form of payment will receive a 1.50% annual cost of living adjustment each April 1st following the 5th year of retirement.

W. 13th Check

Not Applicable

X. Deferred Retirement Option Plan (DROP)

Not Applicable

Y. Other Ancillary Benefits

There are no ancillary benefits-retirement type benefits not required by statutes but which might be deemed a Clair T. Singerman Employees' Retirement System liability if continued beyond the availability of funding by the current funding source.

Z. Changes from Previous Valuation

None
