

# North Miami Police Pension Plan

Actuarial Valuation Report as of October 1, 2020

Annual Employer Contribution for the Fiscal Year  
Ending September 30, 2022

May 4, 2021

Board of Trustees  
North Miami Police Pension Plan  
North Miami, Florida

Dear Board Members:

The results of the October 1, 2020 Annual Actuarial Valuation of the North Miami Police Pension Plan are presented in this report.

This report was prepared at the request of the Board and is intended for use by the Retirement System and those designated or approved by the Board. This report may be provided to parties other than the System only in its entirety and only with the permission of the Board. GRS is not responsible for unauthorized use of this report.

The purposes of the valuation are to measure the System's funding progress, to determine the employer contribution rate for the fiscal year ending September 30, 2022, and to determine the actuarial information for GASB Statement No. 67 for the fiscal year ending September 30, 2020. This report should not be relied on for any purpose other than the purposes described herein. Determinations of financial results, associated with the benefits described in this report, for purposes other than those identified above may be significantly different.

The contribution rate in this report is determined using the actuarial assumptions and methods disclosed in Section B of this report. This report includes risk metrics in Section A but does not include a more robust assessment of the risks of future experience not meeting the actuarial assumptions. Additional assessment of risks was outside the scope of this assignment.

This valuation assumed the continuing ability of the plan sponsor to make the contributions necessary to fund this plan. A determination regarding whether or not the plan sponsor is actually able to do so is outside our scope of expertise and was not performed.

The findings in this report are based on data or other information through September 30, 2020. The valuation was based upon information furnished by the Plan Administrator concerning Retirement System benefits, financial transactions, plan provisions and active members, terminated members, retirees and beneficiaries. We checked for internal and year-to-year consistency, but did not audit the data. We are not responsible for the accuracy or completeness of the information provided by the Plan Administrator.

This report was prepared using certain assumptions approved by the Board as authorized under Florida Statutes and prescribed by the Florida Statutes as described in the section of this report entitled Actuarial Assumptions and Methods. The investment return assumption was prescribed by the Board and the assumed mortality rates detailed in the Actuarial Assumptions and Methods section were prescribed by Chapter 112.63, Florida Statutes. All actuarial assumptions used in this report are reasonable for purposes of this valuation.

This report was prepared using our proprietary valuation model and related software which in our professional judgment has the capability to provide results that are consistent with the purposes of the valuation and has no material limitations or known weaknesses. We performed tests to ensure that the model reasonably represents that which is intended to be modeled.

This report has been prepared by actuaries who have substantial experience valuing public employee retirement systems. To the best of our knowledge the information contained in this report is accurate and fairly presents the actuarial position of the Retirement System as of the valuation date. All calculations have been made in conformity with generally accepted actuarial principles and practices, with the Actuarial Standards of Practice issued by the Actuarial Standards Board and with applicable statutes.

Jeffrey Amrose and Trisha Amrose are members of the American Academy of Actuaries. These actuaries meet the Academy's Qualification Standards to render the actuarial opinions contained herein.

The signing actuaries are independent of the plan sponsor.

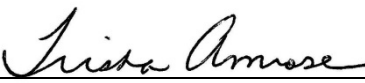

This actuarial valuation and/or cost determination was prepared and completed by us or under our direct supervision, and we acknowledge responsibility for the results. To the best of our knowledge, the results are complete and accurate. In our opinion, the techniques and assumptions used are reasonable, meet the requirements and intent of Part VII, Chapter 112, Florida Statutes, and are based on generally accepted actuarial principles and practices. There is no benefit or expense to be provided by the plan and/or paid from the plan's assets for which liabilities or current costs have not been established or otherwise taken into account in the valuation. All known events or trends which may require a material increase in plan costs or required contribution rates have been taken into account in the valuation.

Gabriel, Roeder, Smith & Company will be pleased to review this valuation and Report with the Board of Trustees and to answer any questions pertaining to the valuation.

Respectfully submitted,

GABRIEL, ROEDER, SMITH AND COMPANY

### **DISCUSSION OF VALUATION RESULTS**

## DISCUSSION OF VALUATION RESULTS

### Closed Plan

In reviewing this Report, it is important for the reader to keep in mind that this Plan was closed to new members after December 1, 2016. One consequence of this closure is that the required employer contribution will generally continue to increase as a percentage of covered payroll as such payroll decreases from year to year.

### Comparison of Required Employer Contributions

The following is a comparison of required contributions developed in this year's and last year's actuarial valuations.

	For FYE 9/30/2022 Based on 10/1/2020 Valuation	For FYE 9/30/2021 Based on 10/1/2019 Valuation	Increase (Decrease)
Required Employer/State Contribution As % of Covered Payroll	\$ 5,118,324 57.59 %	\$ 4,731,505 52.95 %	\$ 386,819 4.64 %
Estimated Credit for State Contribution As % of Covered Payroll	\$ 186,254 2.10 %	\$ 186,254 2.09 %	\$ 0 0.01 %
Required Employer Contribution As % of Covered Payroll	\$ 4,932,070 55.49 %	\$ 4,545,251 * 50.86 %	\$ 386,819 4.63 %
Date of Contribution	October 1, 2021	October 1, 2020	

**The current collective bargaining agreement between the Police Union and the City applies through September 30, 2021. The collective bargaining agreement states that if no new agreement regarding Chapter 185 revenue or employee contributions is reached by September 30, 2021, the allocation of Chapter 185 revenue and the employee contribution rate will revert back to the arrangements that existed on September 30, 2018. This report was prepared assuming the agreement regarding Chapter 185 revenue and employee contributions continues after September 30, 2021 (50%/50% split of Chapter 185 revenue between the City and the Share Plan and 9.51% flat employee contribution rate).**

The contribution has been calculated as though payments are made on the first day of the next fiscal year. Further, the required Employer contribution has been computed with the assumption that the amount to be received from the State in 2021 and 2022 will be at least \$372,509. If the actual payment from the State falls below this amount, then the City must increase its contribution by 50% of the difference.

The actual Employer and State contributions for the year ending September 30, 2020 were \$4,682,955 and \$197,038, respectively, for a total of \$4,879,993. The required contribution was \$4,879,993 for that year.

### **Revisions in Benefits**

There were no revisions in benefits in the current valuation.

### **Revisions in Actuarial Assumptions and Methods**

The investment return assumption was changed from 7.20% to 7.10%, net of investment expenses. The assumed rate of investment return will continue to be lowered by 0.10% each year until reaching 7.00%.

The net impact of the above assumption change increased the required employer contribution by \$171,830 or 1.93% of covered payroll.

### **Actuarial Experience**

During the past year, there was a net actuarial loss of \$2,476,014 which means that actual experience was less favorable than expected. The net loss is primarily due to higher than expected average salary increases and a return on the actuarial value of assets below the assumed rate of 7.2%. Actual average salary increases were 7.3% versus 4.8% assumed. The return on the actuarial value of assets was 6.1%, and the return on the market value of assets was 4.2%. The loss increased the required employer contribution by 2.26% of covered payroll.

### **Funded Ratio**

The funded ratio this year is 73.5% compared to 74.3% last year. The funded ratio was 74.4% before the assumption change detailed above. The funded ratio is equal to the actuarial value of assets divided by the actuarial accrued (past service) liability.

### **Analysis of Change in Required Employer Contribution**

The components of change in the required employer contribution are as follows:

Contribution Rate Last Year	50.86 %
Change Due to Experience Gain/Loss	2.26
Change in Administrative Expense	0.26
Change in Normal Cost Rate	0.07
Change in Amortization Payments on UAL	0.12
Change in Assumptions and Methods	1.93
Change in Benefit Provisions	0.00
Change in State Contribution	<u>(0.01)</u>
Contribution Rate This Year	55.49 %

### **Variability of Future Contribution Rates**

The Actuarial Cost Method used to determine the contribution rate is intended to produce contribution rates which are level. Even so, when experience differs from the assumptions, as it often does, the employer's contribution rate can vary significantly from year-to-year.

Over time, if the year-to-year gains and losses offset each other, the contribution rate would be expected to return to the current level, but this does not always happen.

The Actuarial Value of Assets exceeds the Market Value of Assets by \$3,724,082 as of the valuation date (see Section C). This difference will be gradually recognized in the absence of offsetting gains. In turn, the computed employer contribution rate will gradually increase by approximately 3.39% of covered payroll.

### **Relationship to Market Value**

If Market Value had been the basis for the valuation, the City contribution rate would have been 58.88% and the funded ratio would have been 70.3%. In the absence of other gains and losses, the City contribution rate should increase to that level over the next several years, before reflecting further phase-in of the change in the investment return assumption.

### **Conclusion**

The remainder of this Report includes detailed actuarial valuation results, financial information, miscellaneous information and statistics, and a summary of plan provisions.

## **RISKS ASSOCIATED WITH MEASURING THE ACCRUED LIABILITY AND ACTUARIALLY DETERMINED CONTRIBUTION**

The determination of the accrued liability and the actuarially determined contribution requires the use of assumptions regarding future economic and demographic experience. Risk measures, as illustrated in this report, are intended to aid in the understanding of the effects of future experience differing from the assumptions used in the course of the actuarial valuation. Risk measures may also help with illustrating the potential volatility in the accrued liability and the actuarially determined contribution that result from the differences between actual experience and the actuarial assumptions.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions due to changing conditions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period, or additional cost or contribution requirements based on the Plan's funded status); and changes in plan provisions or applicable law. The scope of an actuarial valuation does not include an analysis of the potential range of such future measurements.

Examples of risk that may reasonably be anticipated to significantly affect the plan's future financial condition include:

1. Investment risk – actual investment returns may differ from the expected returns;
2. Contribution risk – actual contributions may differ from expected future contributions. For example, actual contributions may not be made in accordance with the plan's funding policy or material changes may occur in the anticipated number of covered employees, covered payroll, or other relevant contribution base;
3. Salary and Payroll risk – actual salaries and total payroll may differ from expected, resulting in actual future accrued liability and contributions differing from expected;
4. Longevity risk – members may live longer or shorter than expected and receive pensions for a period of time other than assumed;
5. Other demographic risks – members may terminate, retire or become disabled at times or with benefits other than assumed resulting in actual future accrued liability and contributions differing from expected.

The effects of certain trends in experience can generally be anticipated. For example if the investment return since the most recent actuarial valuation is less (or more) than the assumed rate, the cost of the plan can be expected to increase (or decrease). Likewise if longevity is improving (or worsening), increases (or decreases) in cost can be anticipated.

The computed contribution rate shown on page 1 may be considered as a minimum contribution rate that complies with the Board's funding policy. The timely receipt of the actuarially determined contributions is critical to support the financial health of the plan. Users of this report should be aware that contributions made at the actuarially determined rate do not necessarily guarantee benefit security.

## PLAN MATURITY MEASURES

Risks facing a pension plan evolve over time. A young plan with virtually no investments and paying few benefits may experience little investment risk. An older plan with a large number of members in pay status and a significant trust may be much more exposed to investment risk. Generally accepted plan maturity measures include the following:

	<u>2020</u>	<u>2019</u>
Ratio of the market value of assets to payroll	9.48	9.02
Ratio of actuarial accrued liability to payroll	13.48	12.45
Ratio of actives to retirees and beneficiaries	1.5	1.7
Ratio of net cash flow to market value of assets	0.16 %	1.01 %

### RATIO OF MARKET VALUE OF ASSETS TO PAYROLL

The relationship between assets and payroll is a useful indicator of the potential volatility of contributions. For example, if the market value of assets is 2.0 times the payroll, a return on assets 5% different than assumed would equal 10% of payroll. A higher (lower) or increasing (decreasing) level of this maturity measure generally indicates a higher (lower) or increasing (decreasing) volatility in plan sponsor contributions as a percentage of payroll.

### RATIO OF ACTUARIAL ACCRUED LIABILITY TO PAYROLL

The relationship between actuarial accrued liability and payroll is a useful indicator of the potential volatility of contributions for a fully funded plan. A funding policy that targets a funded ratio of 100% is expected to result in the ratio of assets to payroll and the ratio of liability to payroll converging over time.

The ratio of liability to payroll may also be used as a measure of sensitivity of the liability itself. For example, if the actuarial accrued liability is 2.5 times the payroll, a change in liability 2% other than assumed would equal 5% of payroll. A higher (lower) or increasing (decreasing) level of this maturity measure generally indicates a higher (lower) or increasing (decreasing) volatility in liability (and also plan sponsor contributions) as a percentage of payroll.

### RATIO OF ACTIVES TO RETIREES AND BENEFICIARIES

A young plan with many active members and few retirees will have a high ratio of active to retirees. A mature open plan may have close to the same number of actives to retirees resulting in a ratio near 1.0. A super-mature or closed plan may have significantly more retirees than actives resulting in a ratio below 1.0.

### RATIO OF NET CASH FLOW TO MARKET VALUE OF ASSETS

A positive net cash flow means contributions exceed benefits and expenses. A negative cash flow means existing funds are being used to make payments. A certain amount of negative net cash flow is generally expected to occur when benefits are prefunded through a qualified trust. Large negative net cash flows as a percent of assets may indicate a super-mature plan or a need for additional contributions.

## **ADDITIONAL RISK ASSESSMENT**

Additional risk assessment is outside the scope of the annual actuarial valuation. Additional assessment may include scenario tests, sensitivity tests, stochastic modeling, stress tests, and a comparison of the present value of accrued benefits at low-risk discount rates with the actuarial accrued liability.

## CHAPTER REVENUE

<b>Actuarial Confirmation of the Use of State Chapter Money</b>			
	<b>748 Plan</b>	<b>691 Plan</b>	<b>Total</b>
1. Base Amount Previous Plan Year (Excluding Amount Allocated to Share Plan) <sup>1</sup>	197,038	-	197,038
2. Amount Received for Previous Plan Year	368,587	3,922	372,509
3. Amount Allocated to Share Plan <sup>2</sup>	182,333	1,554	183,887
4. Amount Received for Previous Plan Year After Share Plan Allocation (2) - (3) <sup>3</sup>	186,254	2,368	188,622
5. Benefit Improvements Made in Prior Plan Year	-	-	-
6. Excess Funds for Previous Plan Year	-	2,368	2,368
7. Accumulated Excess at Beginning of Previous Plan Year	-	38,025	38,025
8. Prior Excess Used in Previous Plan Year <sup>4</sup>	-	-	-
9. Accumulated Excess as of Valuation Date (7) - (8) + (6)	-	40,393	40,393
10. Base Amount This Plan Year (Excluding Amount Allocated to the Share Plan) <sup>5</sup>	186,254	-	186,254

<sup>1</sup> 50% of Chapter 185 revenue from FYE 2019, held in reserve in Share Plan to offset required City contribution for FYE 2020.

<sup>2</sup> 50% of Chapter 185 revenue from FYE 2020, less amount allocated to 691 Plan Reserve.

<sup>3</sup> 50% of Chapter 185 revenue from FYE 2020, plus amount allocated to 691 Plan Reserve.

<sup>4</sup> Includes amount allocated to the City and adjustments.

<sup>5</sup> Held in reserve in Share Plan to offset required City contribution for FYE 2021.

Under the collective bargaining agreement covering the period October 1, 2018 through September 30, 2021, the City may apply 50% of the annual Chapter 185 revenue as an offset to the required contribution. The remaining 50% of the annual Chapter 185 revenue is allocated to the Share Plan (with a portion going to the 691 Plan reserve). The City was also previously provided with the balance of unallocated excess Chapter 185 revenue (attributable to the 748 Plan) from the Share Plan which was used as an offset to the required contribution.

\* Descriptions of the source of changes for bases other than (Gain)/Loss are described on the following pages.

#### 10/1/2005 Method Changes:

1. The funding method was changed from Aggregate to Entry Age Normal with a 30-year amortization period.
2. The asset valuation method was changed.
3. The mortality table was changed from the 1983 Group Annuity Mortality Table to the RP 2000 Generational Mortality Table.
4. The investment earnings assumption was changed from 9% per year up to retirement and 7% thereafter to 8.5% per year.
5. The turnover rates were increased by 25%.
6. The salary increase assumption for service above 20 years was decreased from 4% to 3.5%.
7. It is assumed that members will choose the option (lump sum without COLA or annuity with COLA) with the greater actuarial value.

10/1/2005 Benefit Changes: Changed the definition of pensionable compensation to include future holiday pay, changed the period for determining the average final compensation from 60 months to 57 months, and changed the period for determining the average final compensation to 24 months and the early retirement reduction to 3% per year for employees who irrevocably waived their right to receive early retirement benefits upon the completion of 20 years of service.

10/1/2008 Benefit Change: The benefit multiplier was increased to 3.5% for service after January 1, 1998 and the member contribution rate was increased to 11.51% of pay.

10/1/2010 Assumption Change: The timing of expected pay increases was changed from end of year to mid-year timing. The short term payroll growth assumption was also reduced from 6% to 4%.

10/1/2012 Benefit Change: The Plan was amended by implementing a 3% Cost of Living Adjustment (COLA) for survivors in receipt of line of duty death benefits before the Plan's COLA was adopted on September 28, 2004. There is one survivor in receipt of line of duty death benefits who was affected by the Plan change, and the COLA start date for that survivor was retroactive to April 1, 2005.

10/1/2012 Assumption Change: Decreased the investment rate of return assumption to 8.4%.

10/1/2013 Benefit Change: The Plan was amended to allow members who previously waived eligibility for early retirement with 20 years of service regardless of age, who would have 20 years of service on or before January 1, 2013, to revoke their waivers. These members needed to agree to retire from City service on or before January 1, 2013. There was one member of the allowable ten members who elected to revoke their waiver and retired under the window.

10/1/2013 Assumption Change: Decreased the investment rate of return assumption to 8.3%.

10/1/2014 Assumption Change: Decreased the investment rate of return assumption to 8.2%.

10/1/2015 Assumption Change: Decreased the investment rate of return assumption to 8.1%.

10/1/2016 Assumption Changes: Decreased the investment rate of return assumption to 7.5%. Salary increase rates, retirement rates, withdrawal rates, and disability rates have all been revised based on the experience study as of 10/1/2015. The mortality assumption was changed to the same rates used by FRS for Special Risk members in their July 1, 2016 actuarial valuation, as mandated by the Florida Statutes.

10/1/2017 Assumption Change: Decreased the investment rate of return assumption to 7.4%.

10/1/2017 Method Change: The amortization period for the unfunded actuarial accrued liability has been lowered to 25 years for any new bases and for any existing bases that had over 25 years remaining as of October 1, 2017.

10/1/2018 Assumption Change: Decreased the investment rate of return assumption to 7.3%.

10/1/2019 Assumption Changes: Decreased the investment rate of return assumption to 7.2% and the mortality assumption was changed to reflect the mortality rates used by the Florida Retirement System (FRS) for Special Risk Class members in the July 1, 2019 FRS Actuarial Valuation.

10/1/2020 Assumption Change: Decreased the investment rate of return assumption to 7.1%.

**B. Amortization Schedule**

The UAAL is being amortized as a level dollar amount over the number of years remaining in the amortization period. The expected amortization schedule is as follows:

Amortization Schedule	
Year	Expected UAAL
2020	\$ 31,799,146
2021	30,946,808
2022	30,033,946
2023	29,056,271
2024	28,009,181
2025	26,887,747
2030	19,966,996
2035	10,214,840
2040	2,792,458
2045	-

## ACTUARIAL GAINS AND LOSSES

The assumptions used to anticipate mortality, employment turnover, investment income, expenses, salary increases, and other factors have been based on long range trends and expectations. Actual experience can vary from these expectations. The variance is measured by the gain and loss for the period involved. If significant long-term experience reveals consistent deviation from what has been expected and that deviation is expected to continue, the assumptions should be modified. The net actuarial gain (loss) for the past year has been computed as follows:

<b>Derivation of the Current UAAL</b>	
1. Last Year's UAAL	\$ 28,590,791
2. Last Year's Employer Normal Cost	2,232,167
3. Last Year's Contributions	4,879,993
4. Interest at the Assumed Rate on:	
a. 1 and 2 for one year	2,219,253
b. 3 from dates paid	<u>337,173</u>
c. a - b	1,882,080
5. This Year's Expected UAAL (Before Change): 1 + 2 - 3 + 4c	27,825,045
6. Change in UAAL Due to Changes in Plan Provisions	0
7. Change in UAAL Due to Changes in Assumptions	1,498,087
8. This Year's Expected UAAL (After Changes)	29,323,132
9. This Year's Actual UAAL	31,799,146
10. Net Actuarial Gain/(Loss): 8 - 9	(2,476,014)
11. Gain/(Loss) Due to Investments	(931,021)
12. Gain/(Loss) Due to Other Sources	(1,544,993)

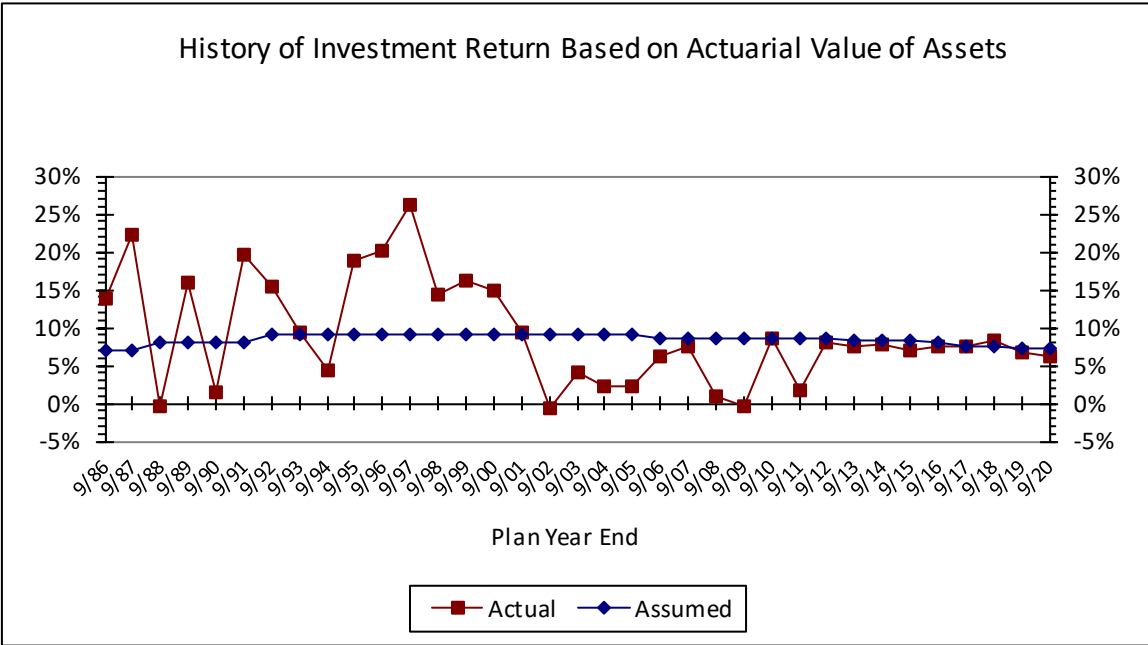

The fund earnings and salary increase assumptions have considerable impact on the cost of the Plan so it is important that they are in line with the actual experience. The following table shows the actual fund earnings and salary increase rates compared to the assumed rates for the last few years:

Year Ending	Investment Return		Salary Increases	
	Actual	Assumed	Actual	Assumed
9/30/1986	13.8 %	7.0 %	5.0 %	6.0 %
9/30/1987	22.3	7.0	6.8	6.0
9/30/1988	(0.5)	8.0	6.9	7.0
9/30/1989	15.8	8.0	7.9	7.0

## ACTUARIAL ASSUMPTIONS AND COST METHOD

### Valuation Methods

**Actuarial Cost Method** - Normal cost and the allocation of benefit values between service rendered before and after the valuation date were determined using an **Individual Entry-Age Actuarial Cost Method** having the following characteristics:

- (i) the annual normal cost for each individual active member, payable from the date of employment to the date of retirement, is sufficient to accumulate the value of the member's benefit at the time of retirement;
- (ii) each annual normal cost is a constant percentage of the member's year by year projected covered pay.

Actuarial gains/(losses), as they occur, reduce (increase) the Unfunded Actuarial Accrued Liability.

**Financing of Unfunded Actuarial Accrued Liabilities** - Unfunded Actuarial Accrued Liabilities (full funding credit if assets exceed liabilities) were amortized by level (principal & interest combined) dollar contributions over a reasonable period of future years.

**Actuarial Value of Assets** - The Actuarial Value of Assets phase in the difference between the expected actuarial value and actual market value of assets at the rate of 20% per year. The Actuarial Value of Assets will be further adjusted to the extent necessary to fall within the corridor whose lower limit is 80% of the Market Value of plan assets and whose upper limit is 120% of the Market Value of plan assets. During periods when investment performance exceeds the assumed rate, Actuarial Value of Assets will tend to be less than Market Value. During periods when investment performance is less than assumed rate, Actuarial Value of Assets will tend to be greater than Market Value.

### Valuation Assumptions

**The actuarial assumptions used** in the valuation are shown in this Section. Both the economic and decrement assumptions were established following the Experience Study Report as of October 1, 2015. The covered group is too small to provide statistically significant experience on which to base the mortality assumption. Mortality is based on a commonly used mortality table and projection scale.

### Economic Assumptions

**The investment return rate** assumed in the current valuation is 7.1% per year, compounded annually (net after investment expenses). The assumed return is being lowered by 0.1% each year until reaching 7.0%.

**The Inflation Rate** assumed in this valuation is 2.5% per year. The Inflation Rate is defined to be the long term rate of annual increases in goods and services.

The assumed **real rate of return** over inflation is defined to be the portion of total investment return that is more than the assumed inflation rate. Considering other economic assumptions, the 7.1% investment return rate translates to an assumed real rate of return over wage inflation of 4.6%.

**Pay increase assumptions** for individual active members are shown below. Part of the assumption for each service year is for productivity, merit and/or seniority increases, and the other 2.5% recognizes inflation.

**The rates of salary increase** used for individual members are in accordance with the following table. This assumption is used to project a member’s current salary to the salaries upon which benefits will be based.

Years of Service	Salary Increase Rates		
	Assumed General Inflation	Promotion, Productivity & Seniority	Total Rates
0	2.5%	6.5%	9.0%
1	2.5%	6.5%	9.0%
2	2.5%	6.5%	9.0%
3	2.5%	5.0%	7.5%
4	2.5%	5.0%	7.5%
5	2.5%	5.0%	7.5%
6	2.5%	3.8%	6.3%
7	2.5%	3.8%	6.3%
8	2.5%	3.8%	6.3%
9	2.5%	3.8%	6.3%
10 - 14	2.5%	2.0%	4.5%
15 - 19	2.5%	1.5%	4.0%
Over 20	2.5%	1.0%	3.5%

### Demographic Assumptions

The **mortality tables** are the PUB-2010 Headcount Weighted Safety Below Median Employee Male Table (pre-retirement), the PUB-2010 Headcount Weighted Safety Employee Female Table (pre-retirement), the PUB-2010 Headcount Weighted Safety Below Median Healthy Retiree Male Table (post-retirement) and the PUB-2010 Safety Healthy Retiree Female Table (post-retirement). These tables use ages set forward one year and mortality improvements to all future years after 2010 using scale MP-2018. These are the same rates used for Special Risk Class members in the July 1, 2019 Actuarial Valuation of the Florida Retirement System (FRS).

Sample Attained Ages (in 2020)	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	0.42 %	0.20 %	32.40	36.24
55	0.56	0.36	27.63	31.21
60	0.93	0.61	23.05	26.43
65	1.32	0.92	18.80	21.93
70	2.09	1.45	14.80	17.68
75	3.56	2.44	11.21	13.75
80	6.35	4.19	8.14	10.30

This assumption is used to measure the probabilities of each benefit payment being made after retirement.

For disabled retirees, the mortality tables used were 80% of the PUB-2010 Headcount Weighted General Disabled Retiree Male Table and 20% of the Headcount Weighted Safety Disabled Retiree Male Table, and 80% of the PUB-2010 Headcount Weighted General Disabled Retiree Female Table and 20% Headcount Weighted Safety Disabled Retiree Female Table, both with no provision being made for future mortality improvements. These are the same rates used for Special Risk Class members in the July 1, 2019 Actuarial Valuation of the Florida Retirement System (FRS).

Sample Attained Ages (in 2020)	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	1.45 %	1.25 %	24.04	26.84
55	1.91	1.50	20.88	23.54
60	2.37	1.81	17.92	20.32
65	3.00	2.22	15.07	17.17
70	3.91	2.90	12.39	14.10
75	5.30	4.13	9.87	11.22
80	7.66	6.21	7.60	8.67

**The rates of retirement** are used to measure the probability of eligible members retiring during the next year.

NORMAL RETIREMENT RATES

40	0.08%
45	0.13%
50	0.25%
55	0.39%

***Changes Since Previous Valuation***

The investment return assumption was lowered from 7.2% to 7.1%. This rate will continue to be lowered by 0.1% each year until 7.0% is reached.

## Miscellaneous and Technical Assumptions

<b><i>Administrative &amp; Investment Expenses</i></b>	The investment return assumption is intended to be the return net of investment expenses. Annual administrative expenses are assumed to be equal to the average of the expenses over the previous two years. Assumed administrative expenses are added to the Normal Cost.
<b><i>Benefit Service</i></b>	Exact fractional service is used to determine the amount of benefit payable.
<b><i>COLA</i></b>	For future cost-of-living adjustments, benefits are assumed to increase 3% per year starting five years after retirement.
<b><i>Decrement Operation</i></b>	Disability and mortality decrements operate during retirement eligibility.
<b><i>Decrement Timing</i></b>	Decrements of all types are assumed to occur at the beginning of the year.
<b><i>Eligibility Testing</i></b>	Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
<b><i>Forfeitures</i></b>	For vested separations from service, it is assumed that 0% of members separating will withdraw their contributions and forfeit an employer financed benefit. It was further assumed that the liability at termination is the greater of the vested deferred benefit (if any) or the member's accumulated contributions.
<b><i>Incidence of Contributions</i></b>	Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made. Contribution balances are rolled forward with an assumed annual interest rate of 5.0%.
<b><i>Marriage Assumption</i></b>	100% of males and 100% of females are assumed to be married for purposes of death-in-service benefits. Male spouses are assumed to be three years older than female spouses for active member valuation purposes.
<b><i>Normal Form of Benefit</i></b>	A ten-year certain and life benefit is the normal form of benefit.
<b><i>Pay Increase Timing</i></b>	Middle of fiscal year. This is equivalent to assuming that reported pays represent amounts paid to members during the year ended on the valuation date.
<b><i>Service Credit Accruals</i></b>	It is assumed that members accrue one year of service credit per year.

## GLOSSARY

<b><i>Actuarial Accrued Liability (AAL)</i></b>	The difference between the Actuarial Present Value of Future Benefits, and the Actuarial Present Value of Future Normal Costs.
<b><i>Actuarial Assumptions</i></b>	Assumptions about future plan experience that affect costs or liabilities, such as: mortality, withdrawal, disablement, and retirement; future increases in salary; future rates of investment earnings; future investment and administrative expenses; characteristics of members not specified in the data, such as marital status; characteristics of future members; future elections made by members; and other items.
<b><i>Actuarial Cost Method</i></b>	A procedure for allocating the Actuarial Present Value of Future Benefits between the Actuarial Present Value of Future Normal Costs and the Actuarial Accrued Liability.
<b><i>Actuarial Equivalent</i></b>	Of equal Actuarial Present Value, determined as of a given date and based on a given set of Actuarial Assumptions.
<b><i>Actuarial Present Value (APV)</i></b>	The amount of funds required to provide a payment or series of payments in the future. It is determined by discounting the future payments with an assumed interest rate and with the assumed probability each payment will be made.
<b><i>Actuarial Present Value of Future Benefits (APVFB)</i></b>	The Actuarial Present Value of amounts which are expected to be paid at various future times to active members, retired members, beneficiaries receiving benefits, and inactive, nonretired members entitled to either a refund or a future retirement benefit. Expressed another way, it is the value that would have to be invested on the valuation date so that the amount invested plus investment earnings would provide sufficient assets to pay all projected benefits and expenses when due.
<b><i>Actuarial Valuation</i></b>	The determination, as of a valuation date, of the Normal Cost, Actuarial Accrued Liability, Actuarial Value of Assets, and related Actuarial Present Values for a plan. An Actuarial Valuation for a governmental retirement system typically also includes calculations of items needed for compliance with GASB No. 67, such as the Funded Ratio and the Actuarially Determined Employer Contribution (ADEC).
<b><i>Actuarial Value of Assets</i></b>	The value of the assets as of a given date, used by the actuary for valuation purposes. This may be the market or fair value of plan assets or a smoothed value in order to reduce the year-to-year volatility of calculated results, such as the funded ratio and the Actuarially Determined Employer Contribution (ADEC).

<b><i>Amortization Method</i></b>	A method for determining the Amortization Payment. The most common methods used are level dollar and level percentage of payroll. Under the Level Dollar method, the Amortization Payment is one of a stream of payments, all equal, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the Amortization Payment is one of a stream of increasing payments, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the stream of payments increases at the rate at which total covered payroll of all active members is assumed to increase.
<b><i>Amortization Payment</i></b>	That portion of the plan contribution or ADEC which is designed to pay interest on and to amortize the Unfunded Actuarial Accrued Liability.
<b><i>Amortization Period</i></b>	The period used in calculating the Amortization Payment.
<b><i>Actuarially Determined Employer Contribution (ADEC)</i></b>	The employer's periodic required contributions, expressed as a dollar amount or a percentage of covered plan compensation. The ADEC consists of the Employer Normal Cost and Amortization Payment.
<b><i>Closed Amortization Period</i></b>	A specific number of years that is reduced by one each year, and declines to zero with the passage of time. For example if the amortization period is initially set at 30 years, it is 29 years at the end of one year, 28 years at the end of two years, etc.
<b><i>Employer Normal Cost</i></b>	The portion of the Normal Cost to be paid by the employer. This is equal to the Normal Cost less expected member contributions.
<b><i>Equivalent Single Amortization Period</i></b>	For plans that do not establish separate amortization bases (separate components of the UAAL), this is the same as the Amortization Period. For plans that do establish separate amortization bases, this is the period over which the UAAL would be amortized if all amortization bases were combined upon the current UAAL payment.
<b><i>Experience Gain/Loss</i></b>	A measure of the difference between actual experience and that expected based upon a set of Actuarial Assumptions, during the period between two actuarial valuations. To the extent that actual experience differs from that assumed, Unfunded Actuarial Accrued Liabilities emerge which may be larger or smaller than projected. Gains are due to favorable experience, e.g., the assets earn more than projected, salaries do not increase as fast as assumed, members retire later than assumed, etc. Favorable experience means actual results produce actuarial liabilities not as large as projected by the actuarial assumptions. On the other hand, losses are the result of unfavorable experience, i.e., actual results that produce Unfunded Actuarial Accrued Liabilities which are larger than projected.

<b><i>Funded Ratio</i></b>	The ratio of the Actuarial Value of Assets to the Actuarial Accrued Liability.
<b><i>GASB</i></b>	Governmental Accounting Standards Board.
<b><i>GASB No. 67 and GASB No. 68</i></b>	These are the governmental accounting standards that set the accounting rules for public retirement systems and the employers that sponsor or contribute to them. Statement No. 68 sets the accounting rules for the employers that sponsor or contribute to public retirement systems, while Statement No. 67 sets the rules for the systems themselves.
<b><i>Normal Cost</i></b>	The annual cost assigned, under the Actuarial Cost Method, to the current plan year.
<b><i>Open Amortization Period</i></b>	An open amortization period is one which is used to determine the Amortization Payment but which does not change over time. In other words, if the initial period is set as 30 years, the same 30-year period is used in determining the Amortization Period each year. In theory, if an Open Amortization Period is used to amortize the Unfunded Actuarial Accrued Liability, the UAAL will never completely disappear, but will become smaller each year, either as a dollar amount or in relation to covered payroll.
<b><i>Unfunded Actuarial Accrued Liability</i></b>	The difference between the Actuarial Accrued Liability and Actuarial Value of Assets.
<b><i>Valuation Date</i></b>	The date as of which the Actuarial Present Value of Future Benefits are determined. The benefits expected to be paid in the future are discounted to this date.

**NOTES TO SCHEDULE OF THE EMPLOYER'S NET PENSION LIABILITY**  
**GASB Statement No. 67**

**Valuation Date:** October 1, 2019  
**Measurement Date:** September 30, 2020

**Methods and Assumptions Used to Determine Net Pension Liability:**

Actuarial Cost Method	Entry Age Normal
Roll Forward Procedures	The Total Pension Liability was developed by using standard actuarial techniques to roll forward amounts from the October 1, 2019 actuarial valuation one year to the measurement date.
Inflation	2.50%
Salary Increases	3.50% to 9.00% depending on service
Investment Rate of Return	7.20%
Retirement Age	Experience-based table of rates that are specific to the type of eligibility condition
Mortality	The mortality tables are the PUB-2010 Headcount Weighted Safety Below Median Employee Male Table (pre-retirement), the PUB-2010 Headcount Weighted Safety Employee Female Table (pre-retirement), the PUB-2010 Headcount Weighted Safety Below Median Healthy Retiree Male Table (post-retirement) and the PUB-2010 Safety Healthy Retiree Female Table (post-retirement). These tables use ages set forward one year and mortality improvements to all future years after 2010 using scale MP-2018. These are the same rates used for Special Risk Class members in the July 1, 2019 Actuarial Valuation of the Florida Retirement System (FRS).

**Other Information:**

Notes See Discussion of Valuation Results in the October 1, 2019 Actuarial Valuation Report.

**SCHEDULE OF CONTRIBUTIONS**  
**GASB Statement No. 67**

FY Ending September 30,	Actuarially Determined Contribution	Actual Contribution	Contribution Deficiency (Excess)	Covered Payroll	Actual Contribution as a % of Covered Payroll
2014	\$ 3,239,178	\$ 3,276,682	\$ (37,504)	\$ 8,327,087	39.35%
2015	3,441,341	3,441,341	0	8,901,956	38.66%
2016	3,640,905	4,135,046	(494,141)	9,185,954	45.01%
2017	3,827,089	3,827,089	0	9,058,510	42.25%
2018	3,967,627	3,967,627	0	9,962,588	39.83%
2019	4,908,116	4,908,116	0	9,667,188	50.77%
2020	4,879,993	4,879,993	0	8,936,209	54.61%

**NOTES TO SCHEDULE OF CONTRIBUTIONS**  
**GASB Statement No. 67**

**Valuation Date:** October 1, 2018  
**Notes** Actuarially determined contributions are calculated as of October 1, which is two years prior to the end of the fiscal year in which contributions are reported.

**Methods and Assumptions Used to Determine Contribution Rates:**

Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Dollar, Closed
Remaining Amortization Period	25 years
Asset Valuation Method	Recognition of 20% of difference between market value of assets and expected actuarial value of assets
Inflation	2.50%
Salary Increases	3.50% to 9.00% depending on service
Investment Rate of Return	7.30%
Retirement Age	Experience-based table of rates that are specific to the type of eligibility condition
Mortality	The mortality table is the RP-2000 Combined Healthy Participant Mortality Table (for pre-retirement mortality) and the RP-2000 Mortality Table for Annuitants (for post-retirement mortality), with mortality improvements projected to all future years after 2000 using Scale BB. For males, the base mortality rates include a 90% blue collar adjustment and a 10% white collar adjustment. For females, the base mortality rates include a 100% white collar adjustment. These are the same rates used for Special Risk Class members of the Florida Retirement System (FRS) in their July 1, 2018 actuarial valuation, as mandated by Chapter 112.63, Florida Statutes.

**Other Information:**

**Notes** See Discussion of Valuation Results in the October 1, 2018 Actuarial Valuation Report.

**SINGLE DISCOUNT RATE**  
**GASB Statement No. 67**

A single discount rate of 7.20% was used to measure the total pension liability. This single discount rate was based on the expected rate of return on pension plan investments of 7.20%. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between the total actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan’s fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments (7.20%) was applied to all periods of projected benefit payments to determine the total pension liability.

Regarding the sensitivity of the net pension liability to changes in the single discount rate, the following presents the plan’s net pension liability, calculated using a single discount rate of 7.20%, as well as what the plan’s net pension liability would be if it were calculated using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher:

**Sensitivity of the Net Pension Liability to the Single Discount Rate Assumption**

<b>1% Decrease</b>	<b>Current Single Discount Rate Assumption</b>	<b>1% Increase</b>
<b>6.20%</b>	<b>7.20%</b>	<b>8.20%</b>
\$52,353,139	\$32,389,552	\$21,419,525

### **SUMMARY OF PLAN PROVISIONS**

## SUMMARY OF PLAN PROVISIONS

### A. Ordinances

The Plan was established under the Code of Ordinances for the City of North Miami, Florida, Chapter 15, Article IV, and was most recently amended under Ordinance No. 1407 passed and adopted on its second reading on December 13, 2016. The Plan is also governed by certain provisions of Chapter 185, Florida Statutes, Part VII, Chapter 112, Florida Statutes (F.S.) and the Internal Revenue Code.

### B. Effective Date

January 1, 1977

### C. Plan Year

October 1 through September 30

### D. Type of Plan

Qualified, governmental defined benefit retirement plan; for GASB purposes it is a single employer plan.

### E. Eligibility Requirements

All police bargaining unit members and general employees initially employed as a police officer trainee before December 1, 2016, the date the City joins the Florida Retirement System (FRS), shall be eligible for membership and shall become members of this system immediately upon being employed on a full-time permanent basis pursuant to the city's administrative rules and procedures. Effective December 1, 2016, all sworn police personnel including police administrators, who are members of this system may remain members of this system or instead may elect to join the FRS as applicable.

### F. Credited Service

Service is measured as the total number of calendar years, or portions thereof, during which the member has served as an employee of the City and has made the required contributions to the Plan. No service is credited for any periods of employment for which the member received a refund of employee contributions.

### G. Compensation

Total compensation including member contributions which are "picked up" by the City.

## H. Average Final Compensation (AFC)

For members who did not waive the 20 and out early retirement provision, AFC is the average of Compensation over the highest 57 months out of the last 120 months of Credited Service prior to termination or retirement. For all other members, AFC is the average of Compensation over the highest 24 months out of the last 120 months of Credited Service prior to termination or retirement. AFC excludes lump sum payment of unused leave.

## I. Normal Retirement

**Eligibility:** A member may retire on the first day of the month coincident with or next following the earlier of:

- (1) age 55 and 10 years of Credited Service, or
- (2) age 50 and 20 years of Credited Service.

**Benefit:** 1.0% of AFC multiplied by years of Credited Service prior to July 1, 1979, plus 3.0% of AFC multiplied by years of Credited Service from July 1, 1979 through December 31, 1997, plus 3.5% of AFC multiplied by years of Credited Service earned on or after January 1, 1998.

**Normal Form of Benefit:** 10 Years Certain and Life thereafter; other options are also available.

**Supplemental Benefit:** Lump sum of member contributions made through September 30, 1982, if applicable.

**COLA:** Members who retire after October 1, 2004 (not due to disability) and elect an annuity form of payment receive an annual cost of living adjustment each April 1st. These retirees may choose a 1.92% COLA with a one-year delay, a 2.50% COLA with a three-year delay, or a 3.00% COLA with a five-year delay.

## J. Early Retirement

**Eligibility:** Members may elect to retire earlier than the Normal Retirement Eligibility upon attainment of age 50 with 10 years of Credited Service. Members who did not waive the 20 and out early retirement provision may elect to retire upon the attainment of 20 years of Credited Service regardless of age.

**Benefit:** For members who did not waive the 20 and out early retirement provision, the Normal Retirement Benefit is reduced by 1.0% for each year that the Early Retirement date precedes the Normal Retirement date. For all other members, the Normal Retirement Benefit is reduced by 3.0% for each year that the Early Retirement date precedes the Normal Retirement date.

**Normal Form of Benefit:** 10 Years Certain and Life thereafter; other options are also available.

Supplemental

Benefit: Lump sum of member contributions made through September 30, 1982, if applicable.

COLA: Members who retire after October 1, 2004 (not due to disability) and elect an annuity form of payment receive an annual cost of living adjustment each April 1st. These retirees may choose a 1.92% COLA with a one-year delay, a 2.50% COLA with a three-year delay, or a 3.00% COLA with a five-year delay.

**K. Delayed Retirement**

Same as Normal Retirement taking into account compensation earned and service credited until the date of actual retirement.

**L. Service Connected Disability**

Eligibility: Any member who incurs a mental or physical condition resulting from injury, disease, or mental disorder, which renders the member incapable of performing satisfactory work for the City is immediately eligible for a disability benefit.

Benefit: 75% of member's Compensation on the date of disability. The benefit will be reduced by amounts paid from other sources to the extent that, when combined with this benefit, they exceed 100% of the rate of pay in effect at the time of the disability. The benefit shall not be less than the accrued pension, or 42% of AFC, whichever is greater.

If a member receives a Service Connected Disability and work is available in a lower medical classification which the member is capable of performing, the member is entitled to a salary of at least 90% of the rate of pay he was receiving prior to becoming disabled. Such salary shall be paid first by the 75% disability benefit.

Normal Form of Benefit: Payable for life, or until recovery from disability. Other options are also available.

COLA: None

**M. Non-Service Connected Disability**

Eligibility: Any member who incurs a mental or physical condition resulting from injury, disease, or mental disorder, which renders the member incapable of performing satisfactory work for the City is immediately eligible for a disability benefit.

Benefit: The member's vested accrued benefit payable at the Normal Retirement date taking into account compensation earned and service credited on the date of disability. For members with at least ten years of credited service, the benefit shall not be less than the accrued pension, or 25% of AFC, whichever is greater.

Normal Form  
of Benefit: 10 Years Certain and Life thereafter payable at the Normal Retirement date, or an actuarially equivalent lump sum payable immediately. Other options are also available.

COLA: None

#### **N. Death in the Line of Duty**

Eligibility: Any member who dies while performing, directly or indirectly, services for the City is eligible for survivor benefits regardless of Credited Service.

Benefit: 50% of the average wages paid to the member during the last 12 months of employment shall be paid to the member's spouse. In addition, 10% of the member's final compensation shall be paid for each child under age 18. In no event shall the total benefit exceed 100% of the member's final compensation. If the member was eligible for normal retirement, the benefit shall not be less than the accrued pension.

Normal Form  
of Benefit: Benefits payable for the life of the spouse. Children's benefits are payable until age 18. If the member was eligible for normal retirement, the benefit shall not be payable for less than 10 years.

COLA: After October 1, 2004, beneficiaries may choose a 1.92% COLA with a one-year delay, a 2.50% COLA with a three-year delay, or a 3.00% COLA with a five-year delay. The COLA is 3.00% per year for survivors in receipt of benefits before the Plan's COLA was adopted on September 28, 2004.

#### **O. Other Pre-Retirement Death**

Eligibility: Any vested member who dies while employed by the City is eligible for survivor benefits.

Benefit: The actuarial equivalent of the vested accrued benefit plus the Member's pre-October 1, 1982 contributions shall be paid to the beneficiaries.

Normal Form  
of Benefit: Lump sum

COLA: After October 1, 2004, beneficiaries may choose a 1.92% COLA with a one-year delay, a 2.50% COLA with a three-year delay, or a 3.00% COLA with a five-year delay.

The designated beneficiary of a plan member with less than 5 years of Credited Service will receive a refund of the member's accumulated contributions with interest.

**P. Post Retirement Death**

Benefit determined by the form of benefit elected upon retirement.

**Q. Optional Forms**

In lieu of electing the Normal Form of benefit, the optional forms of benefits available to all retirees are the Straight Life Annuity option, the 50%, 67%, 75%, and 100% Joint and Survivor options, or the 5 and 10 Years Certain and Life options. A Social Security option is also available for members retiring prior to the time they are eligible for Social Security retirement benefits if they are not retiring under Disability Retirement.

Alternatively, members can elect a partial lump sum with the remaining value of the benefit paid as a monthly annuity. A total lump sum distribution is also available for those who became members of the Plan prior to October 1, 2004.

**R. Vested Termination**

Eligibility: A member has earned a non-forfeitable right to Plan benefits after the completion of 5 years of Credited Service (see vesting table below).

Credited Service	Vested Percent
Less than 5	0%
5	25
6	40
7	55
8	70
9	85
10 or more	100

Benefit: The benefit is the member’s vested accrued Normal Retirement Benefit as of the date of termination. Benefit begins at the member’s Early or Normal Retirement date and will be reduced for Early Retirement if applicable.

Normal Form of Benefit: 10 Years Certain and Life thereafter; other options are also available. In lieu thereof, the Board may elect to make an immediate lump sum payment of the actuarially equivalent benefit.

COLA: Members who retire after October 1, 2004 (not due to disability) and elect an annuity form of payment receive an annual cost of living adjustment each April 1st. These retirees may choose a 1.92% COLA with a one-year delay, a 2.50% COLA with a three-year delay, or a 3.00% COLA with a five-year delay.

Members terminating employment with less than 5 years of Credited Service will receive a refund of their own accumulated contributions with interest.

## **S. Refunds**

**Eligibility:** All members terminating employment with less than 5 years of Credited Service are eligible. Optionally, vested members (those with 5 or more years of Credited Service) may elect a refund in lieu of the vested benefits otherwise due.

**Benefit:** A refund of the member's contributions with interest.

## **T. Member Contributions**

11.51% of Compensation; and if the market value return for the fiscal year is more than 30% greater than the investment return assumption, the member contribution rate for the following year is reduced to 9.51% of Compensation.

For the period October 1, 2018 through September 30, 2021, the employee contribution rate will remain at 9.51% of pay regardless of the investment performance of the Plan. If no new agreement regarding employee contributions is reached by September 30, 2021, the employee contribution rate will revert back to the arrangements that existed on September 30, 2018.

## **U. State Contribution**

Chapter 185 Premium Tax refunds. The City and Police Benevolent Association have mutually agreed that the first \$82,682 of Chapter 185 revenue will be used to offset the City's required contribution, the next \$147,586 of Chapter 185 will be allocated to the Share Plan, and any excess Chapter 185 revenue above \$230,268 will be designated as unallocated and held in reserve as an accumulated excess.

Under the collective bargaining agreement covering the period October 1, 2018 through September 30, 2021, the City may apply 50% of the annual Chapter 185 revenue as an offset to the required contribution. The remaining 50% of the annual Chapter 185 revenue is allocated to the Share Plan. The City was also provided with the full balance of unallocated excess Chapter 185 revenue of \$627,494 to use as an offset to the required contribution. If no new agreement regarding Chapter 185 revenue is reached by September 30, 2021, the allocation of Chapter 185 revenue will revert back to the arrangements that existed on September 30, 2018.

## **V. Employer Contribution**

Any additional amount determined by the actuary needed to fund the plan properly according to State laws.

## **W. Cost of Living Increases**

Members who retire after October 1, 2004 (not due to disability) and elect an annuity form of payment receive an annual cost of living adjustment each April 1st. These retirees may choose a 1.92% COLA with a one-year delay, a 2.50% COLA with a three-year delay, or a 3.00% COLA with a five-year delay.

**X. 13<sup>th</sup> Check**

Not Applicable

**Y. Deferred Retirement Option Plan (DROP)**

Not Applicable

**Z. Other Ancillary Benefits**

There are no ancillary retirement type benefits not required by statutes but which might be deemed a North Miami Police Pension Plan liability if continued beyond the availability of funding by the current funding source.

**AA. Changes from Previous Valuation**

None
